ZEN Air Curtain

Where design meets architecture

Aware of the growing importance of visual impact in today's architecture and interior design, Airtècnics has successfully combined cutting-edge technology with refined aesthetics to create the perfect balance between performance and design.

Decorative, minimalist and elegant, the ZEN air curtain has become a favourite among architects and interior designers. Designed to integrate seamlessly into any environment, ZEN goes beyond the functionality of a conventional air curtain, becoming an integral part of the space and its overall aesthetic.

Beyond its clean design, ZEN offers extensive customisation possibilities, allowing it to adapt to different architectural styles and interior concepts. Its versatile design also enables horizontal, vertical or modular installations, providing maximum flexibility to meet different spatial and design requirements. More than just an air curtain, ZEN becomes a distinctive architectural feature that enhances the identity of any space.

A perfect match for every interior.
